

### Type: Archiving Records

Description: Preserving your treasured vinyl collection has never been easier. Using Hilo to transfer your records into your Mac or PC is as simple as connecting your Phono Pre-amplifier to Hilo's Line IN Left and Right, then connecting the USB from Hilo to your computer. You can then record using your audio software program. Set Hilo as your default sound device in your computer and listen to the playback.

Quality RCA Male to XLR-Male adapter cables can be purchased from the Lynx Webbsite for just \$6.50 each plus shipping and handling.
